### Workshop: From Ordinary to Smart Buildings

**Name: Dina K. Shehayeb**

### Objective

### Field of Experience:

**Dina Shehayeb** is an architect/urban designer and professor, currently the Program Director of the Architecture and Urban Design program at Nile University, as well as the principal of her private practice Shehayeb CONSULT. She earned her M.Sc. in Housing and Neighbourhood Design from Cairo University in 1989, and her Ph.D. from UWM at USA in 1995 focusing on Environment & Behaviour Studies in Urban Design of Streets and Public Space. Specialized in trans-disciplinary research, she works on bridging the gap between the physical environment and its socio-cultural and psychological dimensions.

Her expertise lies in users' needs-based design and planning, revitalizing historic areas, upgrading informal areas, participatory design, as well as development of planning and design guidelines. She has participated in multiple studies and projects with national and international institutions; served on multiple scientific committees including the UN Habitat Scientific Advisory Boards; has more than 30 publications in scientific journals, conference proceedings and books; and has taught and supervised theses nationally and internationally.
